

Adequate mine planning which can be adjusted for operating conditions and contingencies is the best guarantee of profitability for a mine. Rudplan's hands-on expertise, together with the use of high performance software, insures excellent results in the development of mine planning.

Rudplan has successfully performed mine planning for mines, both in operation and in the planning stage.

Rudplan's engineers can develop short or long-term mining plans, justify mining methods and equipment selection and identify different mineralized zones for blending purposes.

Expertise:

- Mine Development
- Mine Planning
- Equipment Selection
- Equipment Fleet Simulation
- Ore Blending
- Production Simulation
- Production Scheduling
- Selection of Mining Methods
- Production Alternatives
- Audits of mine operations
